MANAGEMENT'S DISCUSSION & ANALYSIS REPORT

INDUSTRY STRUCTURE AND DEVELOPMENTS:

India has once again entered the spotlight. With the government pushing for smart cities, there will be a greater demand for solutions to make homes, commercial complexes, industries and cities smarter. Initiatives by the government like “Make in India” and “Digital India”, amongst others, will further boost interest in India as it gives a fillip to the manufacturing sector. **FUTURE READY:** Laying the groundwork for long-term growth. Standard is looking to tap new markets in India by launching superior and innovative products and entering new segments to boost business.

The era of LED lighting has come to stay in India and has already taken firm roots in the Country.

The growing concern for power savings and environment protection prompted authorities around the world to shift to the use of LED lighting. According to an estimate about 15-20% of electricity worldwide is consumed by lighting. Whereas, more than 45% of the rural India does not have any access to electricity and it would be very difficult to provide electricity in these areas in the coming few years owing to the high cost of setting up power plants, cost of generation and cost of transmission.

The government's initiatives to reduce the cost of electricity through use of LED lights instead of traditional lights would also provide tremendous growth potential in this sector. Government of India, in fact, brought out a publication advocating the economic case for the introduction of LED lighting. The publication foresees the rapid reduction of prices of LED lights in the near future, with increased introduction of large volumes of LED lights of various types for both indoor and outdoor applications. Thus, with the growing environment consciousness, LED based lighting provides significant business opportunity.

OPPORTUNITIES AND THREATS:

All round efforts for energy conservation, significant reduction of operating costs in respect of power consumption in corporate offices and 24x7 industries, possibility of providing distributed and de-centralized lighting solutions in rural areas deprived of access to grid power and the thrust being given in this direction by various state agencies, corporate houses, NGOs are bound to provide a large demand for LED luminaries

in both urban and rural environments. Quality of products proven reliability and competitive prices will be the differentiators with respect to competition. The strong in-house D&D base, ability to customize.

The same trends are expected to be valid for India which has demonstrated sustained growth rates in economy, better than many other countries even during the recent melt down. The concerted efforts for improving the rural infrastructure will greatly help the rural lighting market. Some quantitative indices are provided in the text of the annual report.
