Subject: Announcement under Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

Dear Sir/Madam,

In accordance with Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we are pleased to announce that Titan Intech Limited has received Work Orders to install 65" IFPD (Interface Flat Panel Display) LCD Screens in CBSE Schools spread various parts of the country.

The Company has secured its first major work order(sub-contract) to install 65" IFPD LCD screens in 181 CBSE schools spread across the country including Army schools from principle vendor. This initiative will contribute significantly to enhancing the educational infrastructure segment in the country.

This paves the way for the adoption of interactive Direct View Mini-LED displays in smart class rooms, serving as a key element of the smart campus initiative.

Under our brand "Titanview," the Company is creating a niche market for smart campus digital displays utilizing advanced flip-chip Direct View Mini-LED and Mini-LED backlight LCD display technologies. These displays are available in sizes ranging from 55 inches to 165 inches and beyond, supporting standard 2K to 4K resolutions, including UHD formats.

A key feature of this technology is its ability to display 3D content using both passive polarized and active shutter glasses, enabling an immersive and engaging educational experience for students. This patented technology is currently undergoing trials with our key technology provider.

These interactive displays are designed to replace traditional whiteboards, green boards, and blackboards, with a strong focus on B2B markets. The Company is also working to establish a robust dealer-distributor network and establishing experience centers across India for better market reach.

Key features of the displays include:

- Two-step in-depth calibration for accurate and consistent color
- Quality Enhanced image processing and industry-leading contrast ratios
- High brightness and resistance to light interference, ensuring optimal performance under varying conditions

The Company aims to revolutionize educational content delivery in India with its Direct View Mini-LED display solutions, bringing transformative ideas to the forefront through collaboration with technology partners.

This information is being submitted to the Exchange for your records.

Yours faithfully,
For Titan Intech Limited
