DISPLAYS

**MAKING INDIA
THE
GLOBAL
LEADER**

**IN
LED
DISPLAY
TECHNOLOGY**

**MADE IN भारत
MADE FOR भारत**

WE ARE A COUNTRY
BUILT ON BELIEF

A belief that tomorrow can be brighter, stronger, and shaped by our own hands. For decades, we have dreamed of an India that leads in technology, not just follows it. An India where innovation begins at home, where every breakthrough reflects our spirit, our resilience, our identity.

And the DREAM to become the
“**VISHWAGURU**”.

Titan Intech Limited was built on that **BELIEF** to realise that **DREAM**.

Titan Intech, from its early beginnings in 1984 to its evolution into a technology-driven enterprise, has grown with one purpose:

To bring world-class technology within India’s reach, and eventually, under India’s ownership. Because when a nation builds with its own knowledge, its future becomes its own.

Today, UltraLED Displays carries that purpose forward, as the next chapter of India’s display technology journey.

Guided by Titan Intech's legacy and strengthened by global partnerships, UltraLED Displays aims to make advanced LED display technology not only accessible, but reliable, trusted, and proudly Indian. We are not building products, we are building confidence.

Confidence in Indian capability.
Confidence in Indian engineering.
Confidence in an India that will lead the world in visual technology.

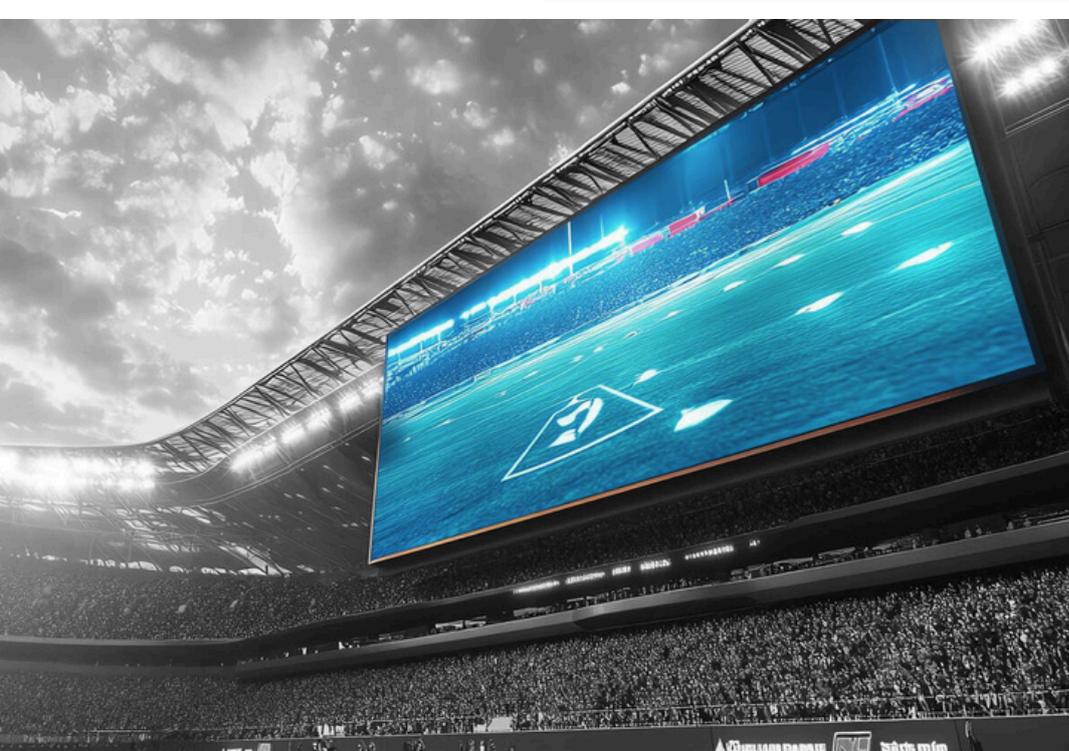

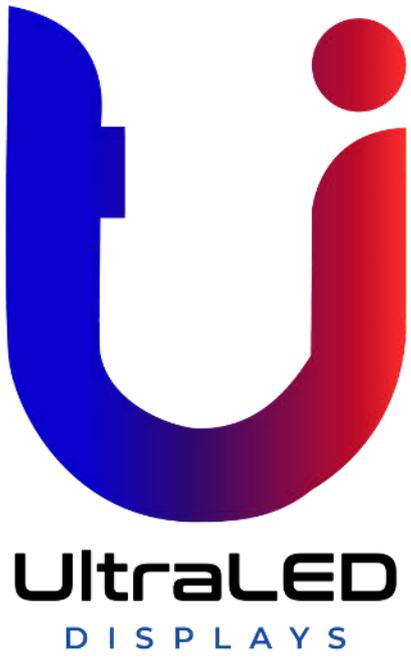

Our journey is driven by purpose, and shaped by a belief that is deeply Indian.

We are here to build display tech and products that people can trust, value, and feel connected to, because it comes from the same land, the same culture, the same aspirations that shape dreams for all of us.

For India.
From India.
With India.

UltraLED DISPLAYS IS A PROMISE!

- A promise that India will no longer depend on borrowed innovations.
- A promise that our schools, our corporations, our infrastructure, and our national institutions will see the
- world through displays built with Indian excellence.
- A promise that technology made here can stand proudly anywhere in the world.
